Oven - Helpful hints and tips

⚠ Warning! Refer to the Safety chapters.

i The temperature and baking times in the tables are guidelines only. They depend on the recipes, quality and quantity of the ingredients used.

⚠ Caution! Use a Deep grill roasting pan for very moist cakes. Fruit juices can cause permanent stains on the enamel.

Top oven

The top oven is the smaller of the two ovens. It has 3 shelf levels. Use is to cook smaller quantities of food. It gives especially good results when used to cook fruitcakes, sweets and savoury flants or quiche.

Main oven

The main oven is particularly suitable for cooking larger quantities of food.

Baking

General instructions

- Your new oven may bake or roast differently to the appliance you had before. Adapt your usual settings (temperature, cooking times) and shelf levels to the values in the tables.
- With longer baking times, the oven can be switched off about 10 minutes before the end of baking time, to use the residual heat.

When you use frozen food, the trays in the oven can twist during baking. When the trays get cold again, the distortion will be gone.

How to use the Baking Tables

- We recommend to use the lower temperature the first time.
- If you cannot find the settings for a special recipe, look for the one that is almost the same.

- Baking time can be extended by 10-15 minutes, if you bake cakes on more than one level.
- Cakes and pastries at different heights do not always brown equally at first. If this oc-

curs, do not change the temperature setting. The differences equalize during the baking procedure.

Tips on baking

Baking results	Possible cause	Remedy
The cake is not browned sufficiently below	Incorrect oven level	Put the cake on a lower oven level
The cake sinks (becomes soggy, lumpy, streaky)	Oven temperature too high	Use a lower setting
The cake sinks (becomes soggy, lumpy, streaky)	Baking time is too short	Set a longer baking time Do not set higher temperatures to decrease baking times
The cake sinks (becomes soggy, lumpy, streaky)	Too much liquid in the mixture	Use less liquid. Look at the mixing times, specially when you use mixing machines
Cake is too dry	Oven temperature too low	Set a higher oven temperature
Cake is too dry	Baking time too long	Set a shorter baking time
Cake does not brown equally	Oven temperature too high and baking time too short	Set a lower oven temperature and a longer baking time
Cake does not brown equally	No equal mixture	Put the mixture equally on the baking tray
Cake does not cook in the baking time set	Temperature too low	Use a slightly higher oven temperature setting
